

SIBV/TOMRES SUMMER SCHOOL 2020

TOMRES

Stress resilience in plants: from molecules to field

Join us **8-10 September 2020... ONLINE!**

We are happy to confirm our summer school will take place in **September 2020!** Due to Covid-19 the whole event will be organized **online**. Nevertheless, we will do our best to ensure students participation and involvement, building a vibrant environment for sharing experiences and ideas. Lectures, workshops, discussion tables are just some of the activities we are planning for our students.

We remind you the course will be held in English and is addressed to PhD students and young researchers in the fields of Plant Biology, Physiology, Biotechnology and Molecular Breeding. Students will still be required to introduce their research projects with a brief oral presentation.

Further details regarding **registration terms and fee, abstract submission** and full **programme** will be communicated within **July 15th, 2020**. All the information will be published on the SIBV website www.sibv.eu. *Stay tuned!*
